

# UltiSat Government Services: GSA Schedule-70 and FCSA Small Business Contract Vehicles

Aimed at making it easier and more affordable for DoD and civilian government entities to purchase secure SATCOM services and solutions, DISA and GSA have partnered on two contract vehicles. Using an indefinite delivery, indefinite quantity (IDIQ) contract and special item numbers (SINs), government agencies can buy complete end-to-end networks that provide efficient and cost-effective global networking from one vendor under a single task order.

These contract vehicles allow UltiSat to provide government agencies with flexibility, choice, and access to a complete range of satellite and professional services, including satellite bandwidth, subscription services, and custom-tailored solutions. Whatever the size, location, or requirements of your network, UltiSat provides customized lifecycle design, engineering, and professional services to ensure reliable, secure, and global networking.

With operations on every continent and global field support, UltiSat can do everything from design to deployment to ongoing operations and maintenance. *We're your partner.*

## UltiSat Delivers:

- Reliable and secure SATCOM networks
- Tailored solutions
- Rapid-response services
- Worldwide coverage
- VoIP, video, data, and IP
- Main and redundant 24/7 secure NOCs (SNOC)
- Teleport services
- Host-nation approvals and landing rights
- Proactive network monitoring
- In-country field service with cleared personnel
- Bandwidth, subscription, and custom services from a single vendor

## Contract Overview and Benefits:

### FCSA CS2-SB

Multiple award, IDIQ contract with small business set-aside. Small business solutions allow federal agencies to acquire professional satellite engineering services and to build custom end-to-end solutions with small business industry partners. This contract is best suited to provide end-to-end commercial satellite communications solutions for large, customized, complex requirements and professional support services.

### GSA Schedule-70

Federal, state, and local governments rely on commercial satellite communications to maintain essential and secure communications, particularly for emergency responders, disaster recovery teams, and war fighters. Benefits include quick deployment for domestic emergency response communications, operations and service variety, and surge capacity for military communications.

# UltiSat Government Services: GSA Schedule-70 and FCSA Small Business Contract Vehicles

## **GSA Schedule-70:** **CONTRACT # GS 35F 0068Y**

Schedule 70 is a long-term, IDIQ contract issued by GSA and signifies that the GSA has determined that the vendor's pricing is fair and reasonable and the vendor is in compliance with all applicable laws and regulations. Purchasing from UltiSat allows agencies to receive goods and services much more quickly. Schedule-70 can also be used for SATCOM by state and local governments.

### **SIN 132-54: Commercial Satellite**

Communications Transponded Capacity  
Owning, operating, or reselling dedicated bandwidth and power on a communications satellite in any available SATCOM frequency band.

### **SIN 132-55: Commercial Satellite**

Communications Subscription Services  
Subscriptions to pre-existing, pre-engineered fixed satellite service and/or mobile satellite service solutions. This typically includes shared or dedicated satellite resources, ancillary terrestrial components, and contractor-specified networks and equipment in any available commercial SATCOM frequency band.

### **SIN 132-08: Purchase of New Equipment**

Supports a robust IT infrastructure and includes all satellite communications and selected equipment such as computer and networking hardware, desktop and laptop computers, computer peripherals, tablets/notebooks, servers, routers and switches, network monitoring tools, wireless devices and data storage devices and drives.

UltiSat takes credit cards for FCSA sales and subscriptions.

## **FCSA Satellite Communications Solutions—Small Business (CS2-SB):** **CONTRACT # GS 00Q 12NSD4000**

CS2-SB allows federal agencies to build custom end-to-end satellite solutions with small business industry partners who offer better, quicker, and more cost-effective solutions than large integrators. These turnkey solutions include all elements that make up a SATCOM network, including:

- Satellite transport (bandwidth)
- Fixed and/or mobile satellite service
- Service-enabling components such as terminals, handsets, and tail circuits
- Teleport services and voice services
- Engineering services to design, integrate, operate and maintain the solution
- Host-nation and landing-rights support

Example networks include:

- Morale, Welfare, Recreation (MWR) networks
- Emergency response and disaster recovery systems
- Satellite-based backup communications networks
- Teleport and voice breakout services
- Tactical networks for field operations
- Distributed distance learning networks
- Communications-on-the move (COTM) solutions for DoD applications

UltiSat can also compete for task orders that solely consist of satellite professional support services:

- Strategic or preliminary planning
- Enterprise architecture design
- System engineering
- Information assurance certification and accreditation
